

INDUCTION OF IMMUNE RESPONSES TO
ISOASPARTYL-MODIFIED ANTIGENS

5

ABSTRACT OF THE DISCLOSURE

The present invention is directed to a method of enhancing the immune response of a patient relative to the normal immune response, by administering isoaspartyl-modified proteins, peptides, or cells, to a patient. The present invention is also directed to vaccines containing the isoaspartyl-modified proteins, peptides, or cells, as well as antibodies reactive with the isoaspartyl-modified proteins, peptides, or cells.
